CORTAVARILLAS BOLT CUTTERS COUPES-BOULONS

Los cortavarillas Ega Master están perfectamente diseñados y fabricados para cortar varillas cilíndricas, varillas de encofrador, mallas de alambre, cables, pernos, etc.

Ega Master bolt cutters are perfectly designed and manufactured for cutting rod, bolts, concrete from ties, cable and wires.

Les coupes-boulons Egamaster sont parfaitement conçus et fabriqués pour la coupe des tiges, des boulons, des câbles et des fils.

1. Sistema multiplicador de par de corte.
Cutting leverage multiplying system.
Accroissement de la coupe par le système multiplicateur.

3. Gran capacidad de corte.
Great cutting capacity.
Capacité de coupe très importante.

4. Mangos ergonómicos y confortables.
Ergonomic and comfortable handles.
Poignées ergonomiques et confortables.

2. El diseño especial reforzado de cabeza permite cortar varillas, pernos, etc. a muy poca distancia de la superficie desde la que sobresalen. El juego de cuchillas está fabricada en cromo-molibdeno, dándole una mayor resistencia y durabilidad gracias a la dureza 62 HRC.

Its strong & specially designed head permits cutting bolts and rods at a very small distance from the surface where they stick out from. Cutting-blades are made in Chrome-Molibdenum, providing a bigger resistance and durability due to their 62 HRC hardness.

Les lames sont fortes et particulièrement conçues pour couper des boulons et sont tiges à une distance très petite de la surface. Les lames de coupe sont faites en Chrome-Molibdenum, fournissant une plus grande résistance et longévité due à leur dureté de 62 HRC.
